

I thoroughly enjoy, use and benefit from weather and traffic updates on satellite radio (I'm a subscriber to both XM and Sirius). I have never listened to local radio, and won't start--even if they take my weather and traffic off satellite. Please reject petition 04-160 from the NAB, and allow satellite radio to provide more services that standard radio fails on, either with subpar service or none at all.

Sincerely,

Glenn Gaslin
